Tirupati, Andhra Pradesh, India

SUMMARY

Python Backend Developer and AI Developer with hands-on experience building REST APIs, role-based full-stack applications, e-commerce platforms, and Generative AI solutions. Skilled in Python, FastAPI, SQL, React, Supabase, Firebase, RAG, LangChain, Gemini API, Docker, and cloud deployment.

TECHNICAL SKILLS

Programming & AI: Python, SQL, LLMs, RAG, Prompt Engineering, LangChain, Gemini API, OpenAI API, Chroma, Pinecone
Backend & Databases: FastAPI, Flask, REST APIs, PostgreSQL, MySQL, Supabase, Firebase, Authentication, RBAC, RLS
Frontend & DevOps: React, JavaScript, HTML5, CSS3, Tailwind CSS, Git, GitHub, Docker, Vercel, Render, Railway

PROJECTS

School ERP Management System | React, FastAPI, Supabase, Firebase

- Developed a role-based School ERP for admissions, attendance, fees, exams, results, homework, transport, library, and academic records.
- Built FastAPI REST APIs, Supabase/Firebase workflows, secure authentication, document uploads, and Admin/Teacher/Student/Parent portals.

SAVVORA E-commerce Platform | React, Tailwind CSS, Supabase, Render

- Developed a responsive e-commerce platform with catalog, search, cart, wishlist, addresses, orders, and role-based admin dashboard.
- Implemented Supabase Auth, PostgreSQL, Storage, RLS policies, checkout workflows, and Render deployment.

Chinni Jewels Client Website | React, Tailwind CSS, WhatsApp API, Vercel

- Delivered a mobile-first client website with product catalog and WhatsApp ordering that sends product, contact, address, and delivery details.
- Built admin content management and fixed Vercel caching/revalidation so image updates sync across phones and laptops.

AI Portfolio Website | React, Tailwind CSS, Firebase, Gemini API

- Built a responsive React portfolio with Firebase and Gemini API to present projects, skills, certifications, and technical achievements.
- Integrated an AI assistant for real-time visitor Q&A and improved mobile performance, SEO, and deployment reliability.

INDUSTRY EXPERIENCE & ACHIEVEMENTS

PayTM Ideathon 2026 | PayTM HQ, Bengaluru -Designed an AI-powered solution focused on business relevance and scalable implementation.

Meta PyTorch OpenEnv Hackathon -Built Python and deep-learning models for real-world challenges, placing in the top 2.8% nationwide.

IIT Madras E-Summit 2026 -Presented an AI-driven automation platform and earned a finalist position for technical innovation.

GNOSIS 2025 National Paper Presentation -Presented research on AI and Generative AI, securing first place.

Microsoft Global Fabric Days 2026 -Explored Microsoft Fabric, Azure AI, data engineering, analytics, and cloud technologies.

ADDITIONAL ACHIEVEMENTS

- Algonex IT Solutions | Python Backend Developer - Built Python/FastAPI APIs, integrated databases/authentication, and supported product development.
- Built and deployed full-stack and Generative AI applications using Python, FastAPI, React, Gemini API, Firebase, and Supabase.
- Applied authentication, RBAC, database integration, API development, responsive UI, Git, Docker, and cloud deployment across projects.
- Collaborated in AI, Python, and UI/UX hackathons to deliver working solutions under time constraints.

EDUCATION

B.Com (Computer Applications) | Emeralds Degree College | Graduation: 2026
